**Ibanez**

"**X**tremely well-designed, the Blade (Classic) feels and sounds great."

**Guitar Player**

**A** very fine instrument with a very good tremolo system. The non-floating (Falcon) tremolo with up-trem capabilities stays in tune virtually as well as a locking system. The Blade (Classic) offers the player vintage appeal combined with modern improvements in playability and sound."

**Guitar Player**

# THE ABILENE THE AUSTIN

The Blade "has added new dimensions of playability to design. Get ready for a treat." Kerrang (UK)

The Blades "offer great sounds, simple operation, distinctive hardware and can be quickly tweaked for most any playing situation. I commend Levinson and everyone associated with Blade for their commitment to high-quality."

*Guitar Player*

Also available: The Delta Queen featuring pickups: LH-4 Humbucker (neck) and T4/2 (lead)

COLOR SHOWN: Three Tone Sunburst  
Also available: Harvest Gold, Misty Violet and Ocean Blue

## CLASSIC DESIGN. CREATIVE TECHNOLOGY

American Gary Levinson proudly offers the world the Blade guitar, an intelligent evolution of classic design with state-of-the-art technology. With more innovations than any guitar line in recent history, the Blade has broken new ground with creative ideas like the exclusive Falcon tremolo, the unique on-board Variable Spectrum Control (VSC), the exclusive Adjustable Tension Guide, the Ez-Access neck rod, and more. Never does the technology get in the way of playability or feel, and in fact the combination will astound you.

### FALCON TREMOLO

on the Blade Classic. The Falcon gives you all the tonal advantages of traditional systems, but allows up-trem techniques as high as three semitones while sitting flat on the top of the guitar. Palm damping, pedal steel bends—even a broken string is possible without going out of tune thanks to the unique, patented dual fulcrum design. The Falcon improves attack and sustain. *Sounds Magazine* states that the Falcon "is a beaut...an unobtrusive, elegantly engineered unit that is frankly, flawless."

### VARIABLE SPECTRUM CONTROL

Traditional tonal boundaries have been vastly expanded through the unique on-board Variable Spectrum Control-VSC. The VSC uses adjustable active presets to broaden the traditional sound possibilities and functions for all pickup selections. Trimpots located on the rear of the Blade allow you to personally set these active sounds to your needs. The middle, bypass position brings you back to the vintage sound. The sound possibilities are endless. For bass players, the Bass VSC gives you the capability of personally trimming two entirely separate sounds to your specific needs. The EQ Character Switch enables you to switch from vintage growl to piano wire slap with a flick of the wrist.

### ATTENTION TO DETAILS

Knobs in the right places, and specially designed hardware to do the job better. Other examples of attention to details include the adjustable string tension guide, the short toggle mini switch and the EZ Access neck rod. The contours on the body are all hand sanded in order to get the lines just right. *Guitar Player* calls the Blades "very well-designed and well-manufactured."

### HARMONY IN SELECTION OF WOODS, HARDWARE AND ELECTRONICS

All parts fit together to create a unit; an instrument that has more to offer than the competition. Blades are not simply "parts off the rack" guitars. Choice American woods and American electronics combined with the very best parts from around the world make the Blade a unique guitar.

### ERGONOMICS AND PLAYING COMFORT

The Blade provides a *position-determined-profile* neck that gives the player a uniform feeling over the entire neck. It has often been said that the neck alone is worth the price of the guitar. Pick up a Blade and you'll see that it fits like your favorite pair of boots.

### TONAL FLEXIBILITY

The wide spectrum response of the SS-1 Humcanceller pickups, coupled with the VSC Blade provide the guitar player with virtually every sound he desires. Blade is an answer to the quest for the ultimate guitar.

"Great wood, great electronics, great sound—heck, this is just one great guitar!"  
Guitar World

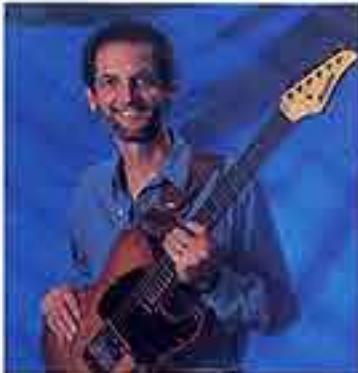

The fret job and finish are satin smooth. This axe will stay in tune. (The Legend) sounds terrific. The noiseless eq adds tremendous flexibility to an already excellent guitar.
